

December 14, 2022

Dear Mr. Anayawa,

I am pleased to welcome GEI Power as an official partner of Power Africa! Allow me to take this opportunity to thank you for your collaboration on this important initiative to double access to electricity in sub-Saharan Africa.

To reach our ambitious goals of adding 30 gigawatts of cleaner, more efficient electricity generation capacity and 60 million new home and business connections throughout sub-Saharan Africa, we rely on strong relationships with our private sector partners to advance more power transactions and enhance the enabling environments in countries across the continent. As a partner, Power Africa offers you:

- Streamlined communication channels to the 12 U.S. Government Agencies participating in the Power Africa initiative;
- Consideration for technical assistance by Power Africa Transaction Advisors under the various USAID technical assistance programs contributing to Power Africa;
- Open lines of communication to the Power Africa Private Sector Engagement Team and the Power Africa lead for the sector group into which your company is placed;
- Opportunities to inform Power Africa's efforts to address critical constraints to power sector development and investment;
- Introductions to other members of the Power Africa network;
- Invitations to Power Africa Partners-only events and related programs; and
- Recognition as a partner on the Power Africa website, in Power Africa publications, and through other media as appropriate.

To facilitate our private sector partnerships program, Power Africa has created sector groups and assigned a Coordinator's Office staff member as the lead for each group. GEI Power was placed in the Renewables (Solar, Wind, Biomass, & Hydro) Sector Group, with Jordi Arimany (jarimany@usaid.gov) serving as lead. He will be in touch shortly, or feel free to reach out to him directly. We look forward to working with you.

Regards,

Mark Carrato
Coordinator for Power Africa
